THE CHOLERA ELSEWHERE

(Continued from 3d page.)

two years by the International Sanitary Commission to induce Turkey to adopt the precautionary measures by which its baneful power might be checked have been unsuccessful.

From that part of India in which the cholera is nearly always epidemic there have been reports this year similar to those of other years. The permanent headquarters of it are in the valley of the Ganges, and it is from there that its infection is carried into other countries. It is only from the British East Indian records that any knowledge of the number of cases of it can be obtained.

There can be merely guesses as to the extent to which the disease prevails in China. In the dispatches there are occasional references to its existence in the Liao-Tong peninsula and in the Kingdom of Corea, and there is every reason to believe that it has been very destructive in these regions. It was by the Japanese soldiers returning home from the Liao-Tong peninsula that it was introduced into Japan a few months ago.

From the trustworthy statistics that are kept by the Japanese authorities it is learned that up to the close of July there had been 9,500 cases of the disease in Japan, more than one-half of which had proved fatal. This fatality may be regarded as part of the price paid by Japan for her victory over the Chinese, but that price was greater yet, for many of the Japanese soldiers who are yet in China have fallen under the disease. It has recently been epidemic over a large part of the Japanese empire.

In some other countries besides those here mentioned, including Mexico and Cuba, there have been cases of cholera during the year, but it has not been epidemic in any of them.

It has been estimated by good authorities that the average yearly number of deaths from cholera the world over is close upon 250,000. It is now known that in Russia alone last year there were nearly 100,000 cases of the disease, about 45 per cent of which proved fatal; but the ravages of the disease among the Russians are light as compared with that among Asiatics. Very likely it has been as widely prevalent in Western Russia, Eastern Austria and Turkey this year as it was last year. The Governments of these countries do not desire that the accurate statistics of it shall be published, and the official reports given therefrom to the world are always wide of the mark.

The experience of Germany in recent years has furnished a remarkable demonstration of the efficiency of scientific and sanitary agencies in keeping out the dreaded disease. Not less interesting is the experience of England, and yet more interesting is that of the State of New York. The Health Board of that city rendered eminent service in the year 1866, and it has rendered service not less eminent upon several occasions since then. The opinion of Dr. Edson has already been given here that there will not again be a cholera scare in New York.

L. B. Kerr has received by the Australia a new line of Scotch gingham, white and cream crepons and white cotton duck for ladies' and children's dresses.*

City Carriage Co., J. S. Andrade, manager. If you want a hack with good horse and careful driver ring up Telephone 113, corner of Fort and Merchant streets. Hack at all hours. *

Bicyclers are likely to get cut, scraped, sprained, bruised, or some way hurt. No matter which, an application of Redding's Russia Salve will take away the smart and pain, and cure the trouble in a hurry. Thousands of wheelmen never go on the road without it. Why should you? 25 cents buys it of any druggist. Handy box for your pocket. Hollister Drug Co., Agts. *

Big Clearance Sale!

Monday, Sept. 2nd, 1895.

Clerks are now busy marking goods down to bedrock; watch this column and note from time to time the prices that I intend to sell goods for during the month of September.

Don't Forget the Date,
Monday, Sept. 2, 1895.
